

URC / Xantech Matrix

Driver Notes

Driver: URC_driver.csd

The URC driver for Xantech matrix products covers all standard switching protocols for all video I/O switching. The driver is one-way only and can be utilized with a TCP/IP or Serial connectivity.

The driver only includes commands to switch standard inputs to outputs, and does not include audio routing options, video wall or multi-view commands, VGA or analogue input switching, nor does this driver include switching commands for the Xantech VIP solution.

Should you have any questions regarding the compatibility of this driver with any Xantech product, please call your local Xantech Technical Support department or email:
